## Time to start something new 3-wavelength laser lifting

### 3D Technology

3 dimension technology with one applicator.  
Featuring its exclusive 3D technology, Soprano Titanium combines the most effective laser wavelengths into a single applicator, simultaneously targeting different tissue depths and anatomical structures near the hair follicle. By combining the absorption and penetration levels of different wavelengths, along with extended treatment coverage, increased comfort and low maintenance requirements, Soprano Titanium is the safest and most efficient rejuvenation modality available today.

## A New Paradigm of Lifting in 3 Waves

## Laser Wavelengths Penetration Depth

## Titanium Lifting

Lifting, Reinvented

	STACK	SHR
Technique	Stamping	In-motion
Pulse Rep. Rate	2-5Hz	10Hz
Depth	more than 6mm	up to 3-4mm
Effect	Lifting & Contouring	Tightening & Brightening

## Long pulse duration & Low peak power

Gradual & Safe heating through repetitive pulse
