Simply Intelligent

Simplicity is the elegant art of distillation, where complexity gives way to clarity and purpose, revealing the essential beauty underneath. Simplicity isn't merely about reduction but rather a deliberate choice to prioritize what truly matters.

In a world where complexity
can be overwhelming,
Alma Harmony™ stands out as
the epitome of simplicity
and intelligence.

It offers the perfect harmony
of versatile technology and simple
operation bridging the gap
between where you are now and
your desired practice,
a whole new world of treatment options
with a simple touch,
Alma Harmony empowers you
to focus on what truly matters:
delivering exceptional results
to everyone.

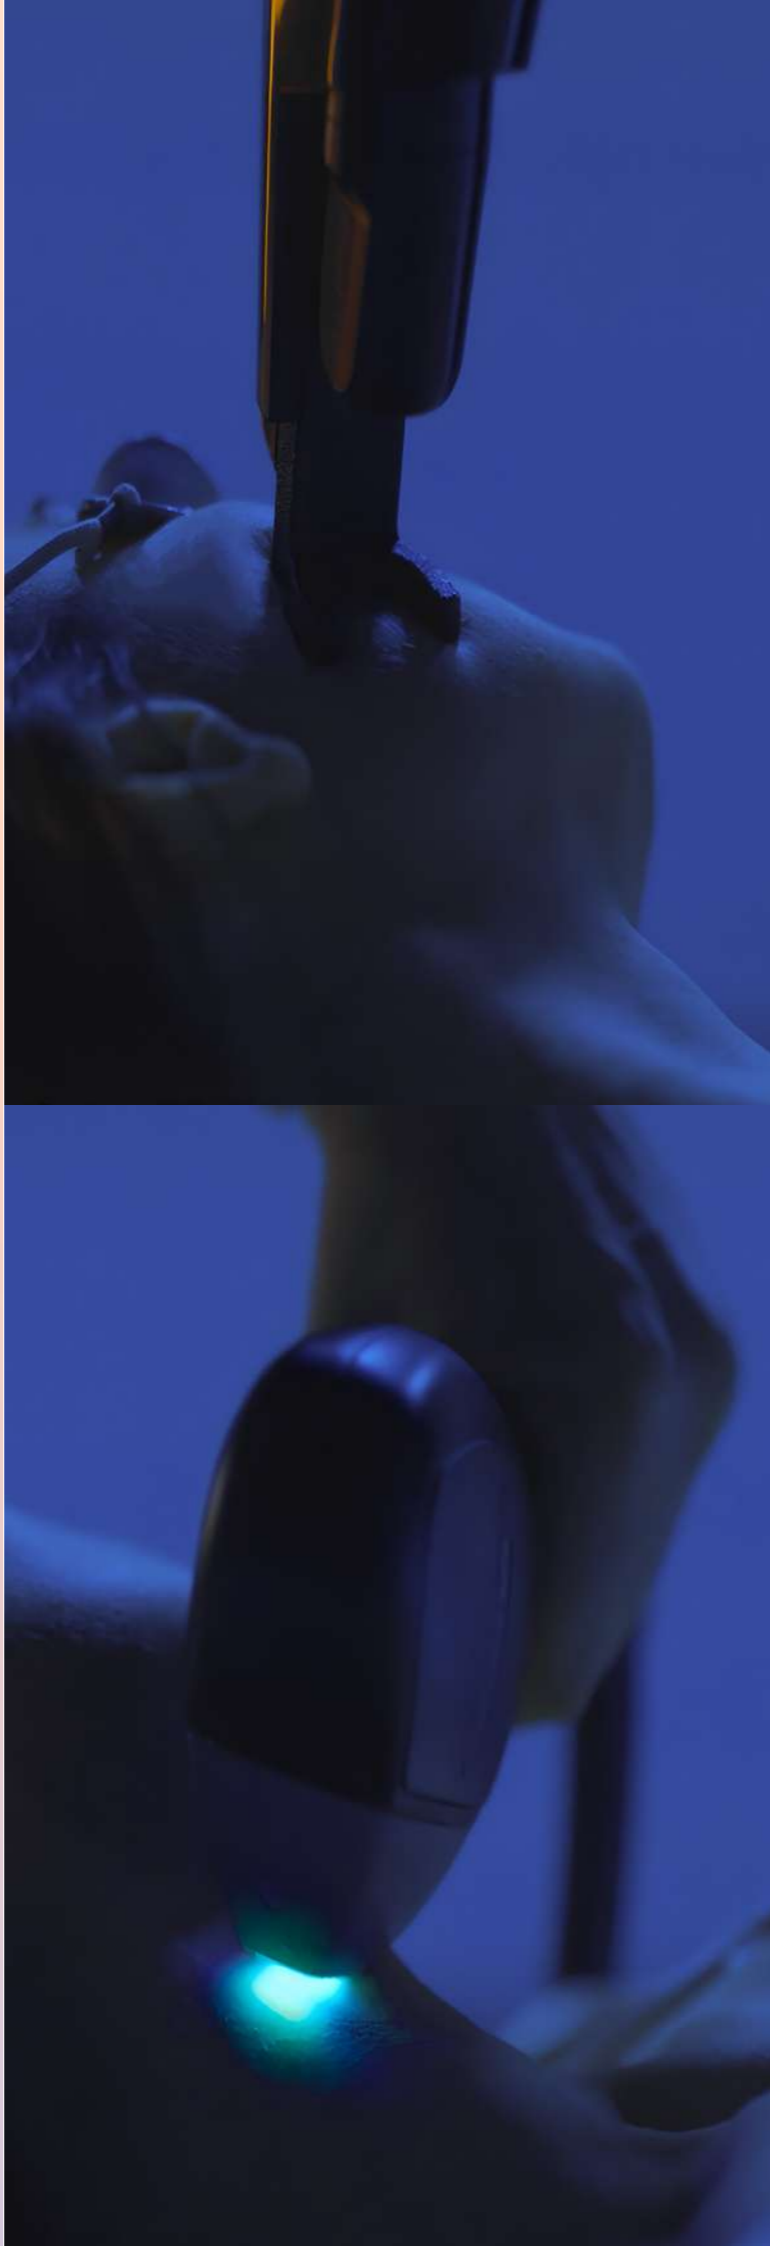

What is the true meaning behind 'simply intelligent'?

01

Simply Intelligent is...

Effortlessly Integrating Technologies for Limitless Diversity

Alma Harmony's superpower is the brilliant integration of the most in-demand technologies. Each of the energy sources within this multiplatform can adapt to almost any indication or skin type, precisely and efficiently delivering a diverse range of personalized treatments that achieve optimal results.

Q-Switch Laser

Enhance your practice with the Q-Switch laser. Adept at targeting dermal layers to stimulate collagen and treat pigmentation, this technology ensures effective skin rejuvenation with minimal downtime.

Fractional Ablative Laser

Refine skin resurfacing with the fractional ablative laser. This technology employs a fractional method to create precise, pixel-sized perforations in the skin, inducing rejuvenation while preserving surrounding tissues for quicker recovery. It effectively targets signs of aging and photodamage, treating pigmented lesions, and addressing various types of scars.

IPL (Intense Pulsed Light)

Leverage IPL's broad spectrum to address diverse skin conditions, like sun damage and vascular lesions. Its strong, targeted absorbency offers a balanced approach to aesthetic improvements across a wide range of patient skin types and concerns.

Non-Ablative Laser

Utilize non-ablative lasers to rejuvenate skin by promoting collagen production from within the dermis. This method offers a substantive yet non-invasive to combat signs of aging, as well as acne and acne scars.

Green Diode Laser

Incorporate the green diode laser for its precise treatment of vascular lesions. Utilizing an optimal wavelength that targets superficial blood vessels enhances both efficacy and safety in vascular treatments.

02

Simply Intelligent is...

Uniting Powerful Lasers in One Platform

A remarkable increase in laser energy*, of up to

45%

This multiplatform stands out in the market, offering the robust capabilities of standalone lasers in a single, sophisticated platform. This enhanced energy enables a broad range of treatable conditions and also deepens the impact of each treatment, providing unmatched efficacy and versatility. With Alma Harmony, clinics can meet diverse client needs without the need for multiple devices, streamlining operations and maximizing treatment options.

Modern design

Premium, modern design ensures that Alma Harmony represents the height of elegance, as the prominent centerpiece in any clinic.

Effortlessly simple

Crafted with user experience in mind, the platform features ergonomically designed applicators and functionality making it seamless to operate.

Customizable presets

A variety of built-in and customizable presets streamline your workflow by allowing rapid upload of parameters, thereby saving time and providing a comfortable and efficient experience for you and your team.

From streamlined flow of operation software, to automated features— every element of Alma Harmony has been meticulously designed to enhance efficiency and ease of use.

Meet the diverse needs of patients – of different ages, skin types, and treatment goals. Treat the most in-demand treatment categories:

Skin resurfacing, tone & texture

Skin rejuvenation and tightening

Vascular lesions

Pigmented lesions and tattoos

Hair removal

Acne & acne scars

Medical Director of Elite Laser
Clinic & Laser Unit at NISA Hospital, Madrid, Spain

Enhance your clinic's offerings

**Harmony
Bio-Boost**

No matter where you aim to position your clinic in the market, Alma Harmony is poised to elevate your journey. With Harmony Bio-Boost™—a branded treatment tailored to enhance your clinic's visibility and service offerings—your practice will not only enrich its treatment repertoire, but also strategically promote your capabilities, setting you apart in a competitive landscape.

Harmony Bio-Boost is a personalized treatment that harnesses the skin's natural healing processes, leveraging the incredible power of bio-stimulation to deliver astounding results.

This **quick lunchtime treatment** goes beyond just a youthful natural look and improved skin tone and texture with **minimal downtime.**; it serves as a **catalyst for collagen renewal and elastin production** that continues to **work for up to six months post-treatment***.

Think of it as enhancing the skin's inherent self-healing mechanisms, providing that extra boost to maximize the skin's potential to the fullest.
