

# LORIENT ELEMENT®

Minimally **Maximum**

Korea's No. 1 Skin Booster for  
Melasma Management

DISTRIBUTED BY

## Specifically, Designated

Each active ingredient in LORIENT ELEMENT has been meticulously designed with a clear purpose. The market is flooded with countless skin boosters, many of which indiscriminately combine ingredients, hoping for one to deliver results by chance. LORIENT ELEMENT, however, stands apart. The ingredients included here were not selected arbitrarily. Each was chosen with precision, carrying a distinct purpose: to effectively address skin brightening and stubborn melasma. It exists for that reason, and that reason alone.

Ingredient	Concentration	Designated Function
Glutathione	51%	Inhibition of melanin production and increasing the skin's natural brightness
Ascorbic Acid	28%	Prevent aging by lowering photo damage and melanin production
Tranexamic Acid	17%	Reduce skin melasma and epidermal pigment deposition
Niacinamide	2%	Brighten the skin, reduce dark spots and improve skin tone
