Multi-Zone Activation

A New Age of Body Remodeling

Conventional body contouring systems are generally based on isolated mechanisms such as thermal stimulation (RF), linear muscle contractions, or adipose-focused technologies.

Modern aesthetic solutions increasingly requires integrated physiological approaches capable of supporting:

- LOCALIZED BODY CONTOUR IMPROVEMENT
- MUSCULAR TONE AND DEFINITION
- CONNECTIVE TISSUE RESPONSIVENESS
- TISSUE PERFUSION AND CIRCULATION
- VISIBLE BODY CONTOUR ENHANCEMENT

Thermodexia™

WONDER VIGOR® introduces a sequential thermal–neuromuscular remodeling platform powered by patented **THERMODEXIA™** technology.

The system integrates:

- CONTROLLED RF THERMOGENESIS
- EXTENDED 1400 µs PULSE TECHNOLOGY
- HELICOIDAL NEUROMUSCULAR ACTIVATION
- MULTI-ZONE MUSCULAR STIMULATION

Unlike conventional RF systems based primarily on thermal stimulation, **VIGOR** introduces helicoidal neuromuscular activation for dynamic mechanical tissue engagement.

The result is a progressive remodeling environment designed to support body contour improvement, muscular definition, and tissue quality enhancement.

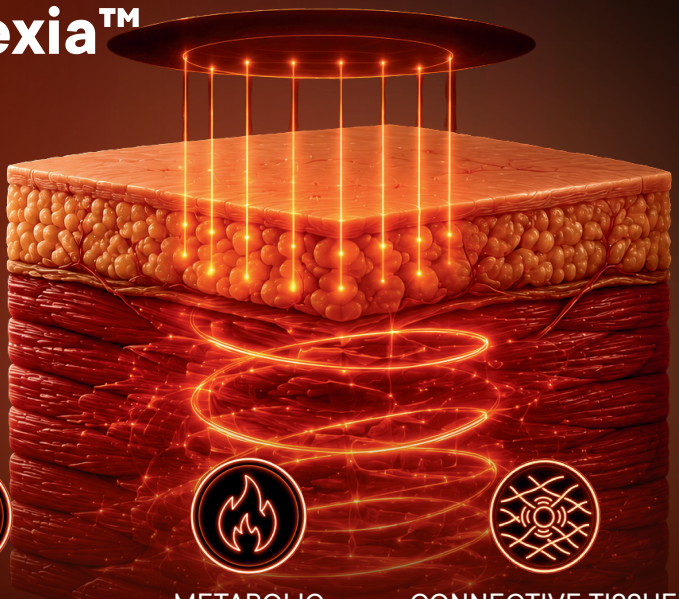

THE HUMAN BODY IS NOT LINEAR,
YOUR BODY REMODELING TECHNOLOGY SHOULD NOT BE EITHER!

The science of Thermodexia™

A PATENTED BIOENERGETIC TECHNOLOGY

THERMODEXIA™ COMBINES:

Controlled RF Thermogenesis
+
Helicoidal Neuromuscular Activation

Sequential treatment protocol designed to support:

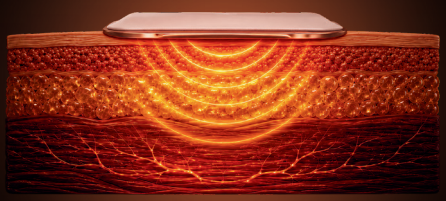

- MUSCULAR RECRUITMENT
- TISSUE RESPONSIVENESS
- LOCAL CIRCULATION
- METABOLIC ACTIVITY
- CONNECTIVE TISSUE ENGAGEMENT

CONTROLLED RF THERMOGENESIS

Controlled RF Thermogenesis uses radiofrequency energy to deliver controlled thermal stimulation to the tissues. This phase helps prepare the treatment area by improving local tissue response and supporting physiological activation.

The RF phase contributes to:

- Controlled tissue heating
- Increased local circulation
- Tissue oxygenation
- Thermal tissue stimulation
- Enhanced tissue responsiveness

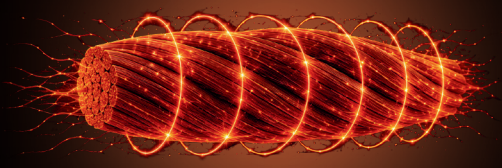

HELICOIDAL NEUROMUSCULAR ACTIVATION

Unlike conventional technologies that generate repetitive linear contractions, **WONDER VIGOR®** produces multidirectional recruitment patterns inspired by the spiral organization of muscle fibers and connective tissue structures.

This activation pattern supports:

- Increased muscular workload
- Dynamic tissue compression and release
- Increased localized muscular workload

WHY 1400 µs PULSE WIDTH MATTERS?

- BROADER MOTOR UNIT RECRUITMENT
- IMPROVED STIMULATION EFFICIENCY
- GREATER TREATMENT COMFORT
- CONSISTENT ACTIVATION ACROSS TARGETED MUSCLE GROUPS

THIS IS NOT CONVENTIONAL MUSCLE STIMULATION,
THIS IS SEQUENTIAL THERMAL – NEUROMUSCULAR REMODELING.

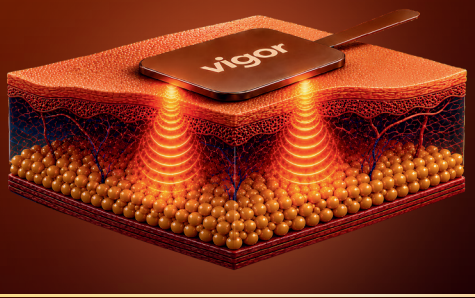

Intelligent Body Remodeling Protocols

WONDER VIGOR® introduces dedicated remodeling protocols designed for multiple body contouring applications.

FAT BURNING

Designed for localized body contouring through sequential thermal stimulation and intensified muscular activation.

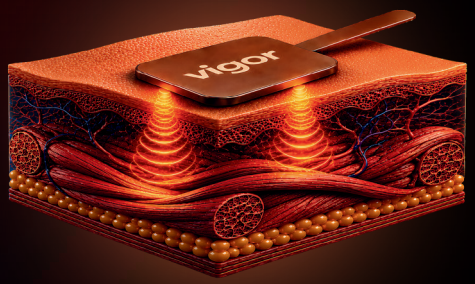

- Localized body contour improvement
- Circumferential remodeling
- Progressive body definition
- Tissue engagement

TONING

Focused on visible muscular activation and body conditioning through helicoidal neuromuscular stimulation.

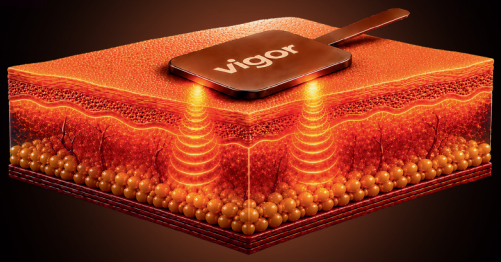

- Muscular tone and definition
- Core engagement
- Tissue firmness
- Functional body aesthetics

SKIN IMPROVEMENT

Controlled thermal stimulation designed to support tissue responsiveness and skin quality.

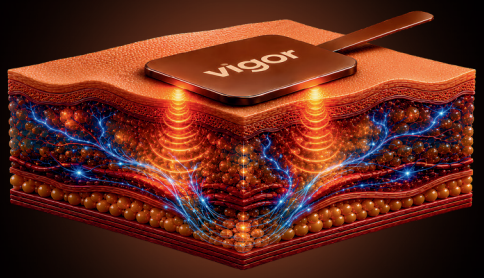

- Skin appearance improvement
- Tissue firmness
- Connective tissue responsiveness
- Thermal tissue activation

ABDOMINAL INFLAMMATION PROTOCOL

Sequential thermal–neuromuscular stimulation supporting abdominal comfort, tissue responsiveness, and local circulation.

- Abdominal bloating appearance
- Fluid accumulation-related tissue heaviness
- Dynamic mechanical tissue compression
- Localized tissue congestion support
- Progressive abdominal conditioning

DESIGNED FOR COMMON BODY CONTOUR CONCERNS

ONE DEVICE.
MULTIPLE BODY REMODELING POSSIBILITIES.

Designed For Modern Aesthetic Clinics

Meets the growing demand for non-invasive body remodeling

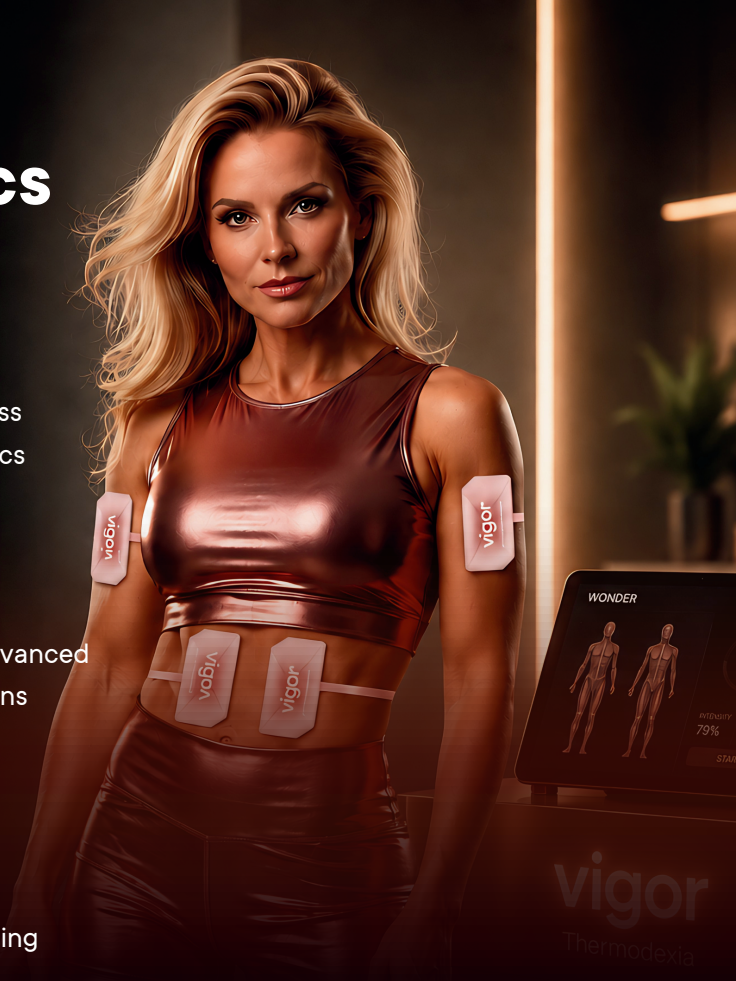

Expands clinics into wellness & longevity-driven aesthetics

Hands-free platform designed for scalable treatment integration

Multi-zone protocols for advanced body contouring applications

Comfortable treatment experience with minimal downtime

For clinics expanding into non-invasive body remodeling

Real Results, Visible Impact
